National Standard of Food Safety

The Limited Quantity of Pathogenic Bacterium in Food

1 Scope

This Standard specifies the index, the limited quantity requirements and test methods of pathogenic bacterium in food.

This Standard is applicable to prepackaged products.

This Standard is not applicable to canned foods.

2 Applications principles

2.1 Whether the limited quantity of pathogenic bacterium is specified, food producer, processor and operator shall take control measures to minimize the content level of pathogenic bacterium in food and reduce the likelihood of the risk event occurring.

2.2 After sampling according to GB 4789.1, it shall conduct the test in accordance with the test methods in Table 1.

3 Indicator requirements

See Table 1 for the limited quantity of pathogenic bacterium in food.
