Standard permissible limits of lead and cadmium release from ceramic ware in contact with food

1 Scope

This Standard makes provisions on standard permissible value of lead and cadmium release from ceramic ware in contact with food.

This Standard applies to porcelain, stoneware, glazed and unglazed ceramic ware in contact with food, but excludes chinaware for food manufacturing industry, packaging and cooking.

2 Normative references

The articles contained in the following documents have become this standard when they are quoted herein. For the dated documents so quoted, all the modifications (excluding corrections) or revisions made thereafter shall not be applicable to this Standard. For the undated documents so quoted, the latest editions shall be applicable to this Standard.

GB/T 3534 Standard testing methods for lead and cadmium release from domestic ceramic

3 Terms and Definitions

For the purpose of this standard, the following terms and definitions apply.

3.1

Flatware

It refers to the ceramic ware with the depth of which from product port to internal lowest plane along the horizontal plane is less than or equal to 25mm.

3.2

Hollowware

It refers to the ceramic ware with the depth of which from product port to internal lowest plane along the horizontal plane is more than 25mm.

The size of hollowware is specified as follows in accordance with its capacity:

3.2.1

Large hollowware

The capacity is more than 1.1L.
