9. Certification mark	12
10. Costs	12
11. Certification liability	12
12. Procedures and time limits regarding technical controversy, compliant and appeal	12
Appendix 1: Requirements for units division and sample presentation of compulsory certification for small-power motor	13
Appendix 2: List and change requirements for key components, materials and nonmetal parts	17
Appendix 3: Requirements for factory's quality assurance capacity	21
Appendix 4: Quality control and inspection requirements for small-power motor production enterprises	27

0. Introduction

Implementation Rules for compulsory product certification - small-power motor (hereafter referred to as Implementation Rules) is formulated according to the provisions of *Implementation regulations for compulsory product certification - small-power motor* (CNCA-C04-01:2014) (hereafter referred to as Implementation Regulations). Implementation Rules is used together with Implementation Regulations as supportive document.

The product scope, certification basis and all other contents of this Implementation Rules shall be in compliance with relevant provisions of Implementation Regulations. It also shall be adjusted according to the notices of directory scoping and adjustment issued by Certification and Accreditation Administration of China (hereafter referred as to CNCA).

In accordance with the provisions of Implementation Regulations, following the principles of maintaining the effectiveness of product certification, improving quality of product, serving certified companies and controlling risk of certification, CQC formulated and issued this Implementation Rules. By means of establishing requirements for classification management of production enterprise and combining the classification of production enterprises, this Implementation Rules determines the implementation requirements for compulsory certification of small-power motor.

0.1 Terms and definitions

0.1.1 Testing at Manufacturer's Premises (TMP for short)

Engineers from appointed laboratory shall carry out the testing with equipment from manufacturer's laboratory. Manufacturer shall assign inspectors to assist. Test report is reviewed, approved and issued by relevant appointed laboratory.

0.1.2 Witnessed Manufacturer's Testing (WMT for short)

Engineers from appointed laboratory shall witness the testing conditions in manufacturer's laboratory and all tests carried out in laboratory with manufacturer's premises, or witness part of testing conditions and items on the basis of the testing plan submitted by manufacturer. Inspectors of manufacturer's laboratory are responsible for providing original records and drafting test report with engineers from appointed laboratory in accordance with prescribed format. Test report is reviewed, approved and issued by relevant appointed laboratory.

0.1.3 ODM (Original Design Manufacturer) production enterprise

ODM is the manufacturer which designs, processes and produces the identical product for one or more producers via the same requirements for quality assurance capability, product design, process control and testing requirements.

0.1.4 Holder of ODM initial certificate

It is an organization that holds the initial product certificate of ODM product.

0.1.5 OEM (Original Equipment Manufacturer) production enterprise

OEM is the manufacturer which produces the certificated product in
